*Abstract:* The General Mining Law (30 U.S.C. 29, 30, and 39) authorizes a holder of an unpatented claim for hardrock minerals to apply for fee title (patent) to the federal land (as well as minerals) embraced in the claim. Division G, Title I of the Consolidated Appropriations Act, 2021 (Public Law No. 116–260), annual appropriation bill for the Department of the Interior, has prevented the BLM from processing mineral patent applications unless the applications were grandfathered under the initial legislation. While grandfathered applications are rare at present, the approval to collect the information continues to be necessary because of the possibility that the moratorium will be lifted and applicable regulations that contain the information are still part of the Code of Federal Regulations.

There are no proposed program or other policy changes requested. The BLM will be adjusting the non-hour cost burden from \$255,375 to \$256,425, an increase of \$1,050. The adjustment results from updating costs estimates.

OMB control number 1004-0025 is scheduled to expire on February 28, 2022. This request is for OMB to renew this OMB control number for an additional three (3) years.

The authority for this action is the PRA of 1995 (44 U.S.C. 3501 *et seq.*).
